# Bendix Sale On Now

## Stock up on Winter Products Today

*Always choose Bendix Air Dryers, Cartridges, Valves and Assembly Kits for premium performance and a comprehensive Bendix warranty.*

### Premium New & Rebuilt Cartridges

5008414PG  
AD-SP/AD-IS PURAGUARD  
CARTRIDGE

5008414  
AD-SP/AD-IS CARTRIDGE

### Industry Leading Air Dryers

109685X  
AD-9 AIR DRYER RX HS 12V

### Purge Valve Assemblies

K022105  
AD-IP/AD-IS PURGE VALVE ASSEMBLY

### Tips for your Air Systems Before and Throughout Winter Weather

- 1) *Keep it dry:* Moisture in the air system can condense and freeze, increasing the odds of brake and valve malfunctions. If the air dryer cartridge hasn't been replaced lately, now is the time to do it. Bendix recommends oil-coalescing cartridges like the PuraGuard®, since oil aerosols passed into the system can be particularly harmful.
- 2) *Check yourself before you wreck yourself:* Check the dryer's purge valve for corrosion or grit accumulation and replace it if necessary. Corrosive road chemicals can damage the purge valve and putting in a new one as a safeguard is a relatively quick and simple bit of preventive maintenance.
- 3) *Manually drain the air tanks to start the season:* Today's vehicles use compressed air for more non-braking functions, including automated manual transmissions, advanced safety systems, and emissions controls. Draining every three months is generally sufficient for typical line haul trucks, but monthly is recommended for vehicles with high air demand.
- 4) *Unless it's an emergency, avoid using de-icing solutions on an air system:* They can corrode O-rings and valve seals. (If one must be used, limit the exposure to as small an area as possible and keep an eye on the affected parts.)
